

# Maximilian Frei

Rumfordstraße 2, 80469 München | maxifrei@protonmail.com | +49 179 4579 169 | maxifrei6.github.io/maximilian-frei

## Education

---

**University of Barcelona — Semester abroad** Feb 26 – Jun 26

- Multivariate Statistics, Econometrics, Forecasting Methods, Spanish B2

**LMU Munich — B.Sc. in Statistics & Data Science, Minor: Computer Science** Oct 23 – Mar 27

- Calculus I & II, Linear Algebra, Probability Theory, Statistical Inference, Machine Learning, Linear Modeling, Programming in R and Python

**Technical University of Munich — B.Sc. in Management & Technology** Oct 22 – Sep 23

- Foundational courses in management, finance, and economics, pivoted to statistics

**Staatliche Fachoberschule Weilheim — German Abitur** Sep 19 – Jul 22

## Experience

---

**Birkenstock — Working Student** Mar 23 – Feb 26

### Global Analytics & BI

- Created a lineage tracker from data warehouse ingestion to downstream analytics (e.g. Tableau) to monitor dependencies and data access; supported Snowflake implementation.
- Built a progressive ensemble for order forecasting using Prophet, XGBoost, and other statistical models, continuously improving predictive performance.
- Improved order forecast accuracy by integrating Weather API data (via correlation-based feature selection) and building geospatial order mapping for regional demand patterns.
- Built automated Google PageSpeed tracker to measure webshop replatforming performance.

### Digital Operations Europe

- Automated invoice checks for inbound shipments using Python, saving 5 hours of manual work weekly.
- Processed customer service data with Python and developed Tableau dashboards to monitor claims and detect product faults, driving quicker resolutions.

## Projects

---

**Microbial Network Communities** [Github]

- Compared Atlantic and Pacific marine microbial co-occurrence networks using community detection and consensus clustering; interpreted modules with taxonomy and environmental variables for a seminar thesis.

**Stroke Circadian Metabolomics** [Github]

- Analyzed circadian patterns in stroke patient metabolomics (LMU Hospital) using pathway scores, multiple imputation, and Lasso regression.

*Full write-up, figures, and PDF on my portfolio (link above).*

## Initiatives

---

**Student Representative** Sep 21 – Aug 22

- Led a later school start initiative that reduced students' public-transport waiting times.
- Organized yearbook, diploma awarding ceremony and clothing donation campaign for Ukraine.

## Skills

---

**Languages:** German (native), English (native-level), Spanish (B1/B2), French (A2)

**Technologies:** R, Python, SQL, LaTeX, Tableau, Power BI, GCP, AWS, Contentsquare, Jira & Confluence
